

Datascope **Gas Module 3**

The Datascope Gas Module 3 is ready to handle the pressure of your demanding surgical environment. Compatible with the Datascope Passport V and Spectrum line of monitors, the Gas Module 3 ensures efficient, breath-by-breath gas and agent analysis.

Doctor's Depot realizes how central gas maintenance is to anesthesia care. Our team is committed to properly maintaining all aspects of the high-functioning Gas Module 3, so that your patients are constantly under the vigilant watch they deserve.

Specifications

- » Breath-by-breath O₂, CO₂, and N₂O monitoring
- » Automatic 5-agent identification (Isoflurane, Sevoflurane, Desflurane, Halothane, and Enflurane.)
- » Compact, light-weight design ensures convenient mounting on anesthesia delivery systems
- » Compatible with Spectrum V and Passport monitors.

Overview

Highly efficient and intuitive equipment makes all the difference in your hospital, which is why the Gas Module 3 was created. As a foundation for a Passport-V or Spectrum Anesthesia monitor, the five-agent and patient gas exchange analysis provides precise care, every second.

Breath-by-breath measurement of patient gases is what allows you to deliver your highest level of anesthesia care. The Gas Module 3 is consistently reading inspired and expired O₂, CO₂, N₂O, and any one of the following five anesthetic agents - Isoflurane, Sevoflurane, Desflurane, Halothane, and Enflurane. Suited for a myriad of mid-to-high acuity settings, the Gas Module 3 will easily integrate into your lineup and remain a highly efficient partner in analysis.

A compact, lightweight design cuts down on maneuvering time and a simplified cable management system means fast, easy integration into your anesthesia routine.

Refurbish Process

Doctors Depot ensures the utmost care goes into maintaining all components of the Datascope, Datex Ohmeda, Drager, GE and Mindray anesthesia machines we sell.

Doctors Depot takes on a painstakingly detailed refurbishing process to ensure that the Gas Module 3 works the way you need it to. Doctor and clinician satisfaction is our top priority, just like your patients safety and comfort is to your team.
