

Datascope Gas Module SE

The Datascope Gas Module SE stands apart in its ability to withstand the pressure of OR anesthesia care. Configurable framework makes the SE an ideal choice for multiple-user clinics, and breath-by-breath measurements of inspired and expired gases ensures proper agent administration.

The machine's ability to handle anesthesia care demands is of utmost importance to you, which is why a meticulous refurbishing process is of paramount importance to us. Doctors Depot guarantees that the Gas Module SE your facility needs, is the one you will get.

Specifications

- » Identification and quantification of inspired and expired O₂, CO₂, N₂O, and 5 anaesthetic agents – Halothane, Isoflurane, Sevoflurane, Desflurane, and Enflurane.
- » Communicates with the Passport 2, Spectrum and Spectrum OR monitors via RS232
- » Quick-action keys

Overview

The Datascope Gas Module SE offers your operating room state-of-the-art gas and agent monitoring, quantifying each with every breath. Compatible with Passport V and Spectrum OR monitors, the Gas Module SE can be tailored to the needs of your clinic and all of your unique patients.

Ensuring that your patients receive correct gas exchange, the Gas Module SE constantly identifies and measures both inspired and expired O₂, CO₂, N₂O, along with 5 anaesthetic agents – Halothane, Isoflurane, Sevoflurane, Desflurane, and Enflurane. Well-suited for a multi-user environment, the SE can be configured to many clinician needs.

Housed in a compact body with quick-action keys, the Gas Module SE is easily integratable into your current anesthesia work space. When paired with Passport 2 and Spectrum OR monitors, the SE helps provide continuous vital sign monitoring and crucial trending.

Refurbish Process

Doctors Depot ensures the utmost care goes into maintaining all components of the Datascope, Datex Ohmeda, Drager, GE and Mindray anesthesia machines we sell.

The Gas Module SE works hard to help you properly administer anesthesia, which is why our team at Doctors Depot goes above and beyond to ensure each component is tested, repaired and replaced as needed. Each SE we refurbish gets unique attention, just like your patient roster.
