

Datascope Passport 2

A Passport 2 pairs the power of Datascope machines with the simplicity of a compact, portable monitor. Six automatically configured waveforms display alongside 120 patient time and trend measurements, giving you peace of mind that vital signs are accurately measured and always within reach.

Each day brings new challenges in anesthesia care, which is why the Passport 2 offers familiar and consistent monitoring protocols. Doctors Depot goes above and beyond to ensure that the Passport 2's user-friendly interface, with all of its working parts, meets your expectations for patient vigilance.

Specifications

The Passport 2 delivers clear vital sign measurements, with Doctors Depot maintained specifications like:

- » Dedicated function keys provide one-touch access to all vital functions
- » Colorful waveforms with automatic display configuration simplify use and enhance display visibility
- » Six waveforms, auto-adjustable large numerics, 3 or 5-lead ECG, lead-selectable respiration, non-invasive blood pressure, temperature, and Masimo SET® motion tolerant SpO2
- » View 12™ ECG analysis module offers diagnostic quality 12-lead ECG interpretation with ST and arrhythmia analysis in a compact, easy-to-use module
- » Built-in PCMCIA ports allow you to upgrade software, enhance memory, and transfer data with minimal effort
- » Integrated power supply with lithium-ion battery technology provides uninterrupted patient care during transport
- » Network to Panorama™ Central Station for continuous data storage

Optional:

- » Arrhythmia analysis, 3-lead ST analysis with trends and alarms, Microstream® CO2, Nellcor® OxiMax® SpO2, two invasive blood pressures, and a dual trace recorder.
- » View 12™ Analysis Module, to print diagnostic quality 12-lead ECG data to a laser printer

Overview

When vital sign measurement is so paramount to your practice, intuitive functions and precise quantifications make a world of difference. The Passport 2 monitor is the best example of this simplicity in power. Industry standard specifications are met with a myriad of options, for the customized anesthesia viewing system your clinic requires.

Automatic waveform display enhances data management, supporting up to six vital records. List and graph trends store up to 120 time measurements, expandable to 500 entries with extended memory, adding valuable information on your patients status. Upgrading software, enhancing memory and transferring data requires minimal effort when using PCMCIA ports, allowing your time and energy to be focused on other aspects of care.

A Datascope exclusive navigator knob and dedicated function keys put Passport 2 functions right at your fingertips, while a 10.4 inch color TFT display with large, auto adjustable numerics keeps measurements where you can see them. The base station docking device offers instant connectivity to various peripheral equipment, allowing you to tailor your anesthesia plan to exact specifications.

Refurbish Process

Doctors Depot ensures the utmost care goes into maintaining all components of the Datascope, Datex Ohmeda, Drager, GE and Mindray anesthesia machines we sell.

A Datascope 2 Passport brings simplicity to an otherwise complicated field, and Doctors Depot aims to make your buying decisions even easier. Our team goes above and beyond in restoring this (and every) monitor so that the machine you want, is the machine you get.
