

Datex Dash 4000

The Datex Dash 4000 monitor displays advanced clinical parameters, while remaining lightweight and rugged for optimal transport.

Delivering a wide range of powerful measurement tools, like high resolution CRG trends, the Dash 4000 is an exceptional choice for the fragile nature of NICU, geriatric and hypo/hyper tensive care.

Doctors Depot ensures that the Dash 4000 is restored to exceptional Datex standards, with the added attention to detail that comes from our team's experience with this monitor. Our goal is to deliver you with the exact machine you need, so that you can maintain the superior quality of your practice.

Specifications

A Dash 4000 offers exceptional capabilities, with Doctors Depot maintained specifications like:

- » GE EK-Pro four lead arrhythmia analysis
- » GE 12SL simultaneous 12 lead ECG detection provides improved P-wave detection, age and gender-specific interpretation and 12 lead buffer - while MUSE* is offline, up to 12 ECGs are stored.
- » GE DINAMAP* SuperSTAT* blood pressure algorithm supports speed, comfort and artifact rejection for virtually all types of patients.
- » Colorful, high-resolution 10.4" display
- » Wired or Wireless Networking options

Overview

While no two days in your clinic are alike, the Dash 4000 remains consistent in its ability to quantify, record and transmit crucial patient data. From presentation in the Emergency Department to surgery in the OR and transfer to the Stepdown unit, a Dash 4000 keeps your clinicians connected.

The Dash 4000 displays up to 7 waveforms and 4 invasive blood pressures, with simultaneous age and gender-specific ECG monitoring and multi-lead arrhythmia analysis to prevent chronic AFib. High resolution CRG trends also make the Dash 4000 exceptionally helpful in NICU monitoring, while SuperSTAT algorithm can support geriatric and hypo/hyper tensive patients.

The Dash 4000 monitor was specifically designed to handle the changing demands of bedside monitoring. A rugged, portable structure allows for continuous trending and alerts on the move, with powerful parameters displayed on a colorful 10.4" screen.

Refurbish Process

Doctors Depot ensures the utmost care goes into maintaining all components of the Datascope, Datex Ohmeda, Drager, GE and Mindray anesthesia machines we sell.

Our team takes pride in restoring all components of the Dash 4000, from its inner workings to the crisp display screen and exterior finish. Doctors Depot works hard to deliver just the machine you need, at a cost you can afford.
