

Datex FM Monitor

The Datex FM monitor offers your rotating patient roster the versatility it requires. Comprehensive monitoring aims to fit a myriad of needs, with advanced ECG, haemodynamic and CO2 measurement, all displayed on a large, clear screen. Your day shouldn't get any more complicated, which is why the FM Monitor strives to simplify.

Doctors Depot recognizes the FM monitor as a leader in anesthesia care monitoring, and treat it as such in refurbishing process. We enlist knowledgeable technicians and a detail oriented maintenance routine that allows us to offer the best in refurbished medical equipment, including the FM monitor.

Specifications

The Datex FM monitor is refurbished to manufacturer specifications, by Doctors Depot technicians, with components that include:

- » Integrated wireless technology for continuous centralized monitoring
- » Bright, large colour screen gives complete view of patient status at a glance
- » Detachable E-PSM Patient Side Module travels with the patient to the next care site, saving time and effort
- » Long battery operating time, up to 5h, and easy battery replacement ensure constant power for safe and uninterrupted monitoring during interhospital transportation.
- » Remote iTouch Pad for easy access saving time and effort

Overview

A Datex FM monitor provides premium care for all intermediate anesthesia applications. As a vigilant counterpart in your facility, the FM monitor is able to quantify vital signs and alert you of patient trends, minute for minute.

Centralized monitoring has never been so powerful and intelligent, for such a wide range of departments - from high-dependency units to recovery rooms. Advanced ECG, haemodynamic and CO2 monitoring is displayed at every bedside, with an intelligent alarm system that offers configurable parameters that adjust in critical situations, no matter the location.

Since anesthesia care and interhospital transportation go hand in hand, the FM monitor is able to tackle both. Multiple mounting solutions and a wide range of accessories ensure easy and flexible

workplace configuration, while data automatically adjusts to maximize the size and value of waveforms, depending on patient and viewer needs.

Refurbish Pro-

Doctors Depot ensures the utmost care goes into maintaining all components of the Datascope, Datex Ohmeda, Drager, GE and Mindray anesthesia machines we sell.

Doctors Depot has extensive experience working with FM monitors, and understand their advanced inner workings. From critical measurement tools to the last coat of paint, our team takes pride in upgrading the FM monitor to like-new condition.
