

Dräger Narkomed Mobile

The Narkomed Mobile remains the thinnest machine in its class, capable of outfitting your small operating room, outpatient facility or office-based practice. Your need for a slim, stable anesthesia unit is matched by a diligent, fully-integrated ventilator and monitor, analyzing volume, pressure and oxygen data.

The unique architecture of the Narkomed Mobile is expertly maintained by our team, who values the space-saving frame, along with the high-functioning technical aspects. All of these components are refurbished to work, feel and look like new.

Specifications

The Narkomed Mobile comes equipped to handle anesthesia demands in tight quarters, with Doctors Depot maintained features including:

- » 110 / 220v, 50 / 60 Hz, 250 watts, 2.5amps max
- » Battery back-up to fully power all operations for a minimum of one hour
- » Carbon Dioxide Absorber
- » Oxygen Absorber
- » Integrated Ventilator: flow rate of 0 - 5 LPM
- » Vaporizer: spill proof with minimum capacity of 100 ML
- » Nitrous Oxide capability
- » Operational Range of 40 - 61 PSI
- » Adaptable to use in both active and passive gas scavenging systems
- » Supplied with gas pressure gauges
- » Break-Resistant Flow Meters
- » Oxygen Flush Valve
- » 6" Castor wheels

Overview

A Narkomed Mobile puts the anesthesia capabilities of Dräger machines to work in a slim-profiled, effortlessly-positioned unit. Your patients need tailored, dedicated care for agent and gas ventilation, and you need architecture that saves your facility its invaluable space.

The Narkomed Mobile' ventilator can handle tidal volumes as low as 20mL, making it suitable for a wide patient base - children included. A conveniently located monitor analyzes volume, pressure and oxygen data, breath for breath. The Narkomed Mobile provides outstanding agent exchange with a single vaporizer mounting position, 3-gas circuit central gas supply connections for o₂, n₂O and air as well as cylinder yokes for o₂ and n₂O.

Having function keys and vital information close by is paramount to anesthesia delivery, which is why the VPO monitor can be tilted for a wide range of views and also folds to the side for transportation, ideal for passing narrow doorways and other equipment. A mounting bar allows for secondary monitoring solutions, while the base is capable of handling two vaporizers. A swinging drawer puts accessories where you need them, whether its out front or to the side of the Narkomed.

Refurbish Process

Doctors Depot ensures the utmost care goes into maintaining all components of the Datascope, Datex Ohmeda, Dräger, GE and Mindray anesthesia machines we sell.

In keeping with Dräger standards, our team refurbishes the Narkomed Mobile to the dependable, familiar specifications it was manufactured to. Central components like gas supply connections are put through rigorous quality tests, while aesthetic elements such as paint, metal and plastic are restored.
