

Dräger Narkomed MRI 2

The Narkomed MRI 2 sets the pace for your MRI facility. As the only anesthesia system touting an integrated ventilator and VPO monitor specifically designed to perform in MRI environments up to 3.0 Tesla, the Narkomed MRI 2 ensures focused care for imaging procedures.

The Narkomed MRI 2 stands out as a leader in demanding magnetic imaging settings, which is why we refurbish all components to meet these specific requirements.

Specifications

The Narkomed MRI 2 is equipped to handle imaging center demands, with Doctors Depot maintained features including:

- » Integrated Monitor
- » Patient Suction
- » Battery Backup
- » AV2+ Ventilator
- » Flow Sensor
- » Absorber Assembly
- » Optional Scavenger System

Refurbish Process

Doctors Depot ensures the utmost care goes into maintaining all components of the Datascope, Datex Ohmeda, Dräger, GE and Mindray anesthesia machines we sell.

The familiar Narkomed patient suction system, absorber assembly and ultrasonic flow sensor are just a few of the crucial elements the MRI 2 offers, that Doctors Depot takes care to test and restore. Understanding what this anesthesia delivery system adds to your imaging practice, our team spares no expense to make it fully functioning.

Overview

A Narkomed MRI 2 brings technologically advanced, easy-to-use anesthesia ventilation and monitoring solutions to the MRI workplace, where new challenges abound. Designed to withstand highly magnetic atmospheres without image distortion, the Narkomed MRI 2 is an unmatched partner in care.

Because comfort in MRI collection is your goal, a Narkomed MRI 2 makes swift and intelligent work of anesthesia therapy. The AV2+ pressure-limited anesthesia ventilator, equips your clinic with electronic timing, pneumatic circuitry and independent controls for flexible ventilation. An integrated monitor displays patient vital data, including configurable alarms that warn of exceeded parameter limits. Using anesthesia during MRI shouldn't be an added burden, but a simple, beneficial tool.

A compact yet customizable body includes an integrated monitor that displays oxygen and volume levels alongside an airway pressure waveform, while two fixed handles let you move the Narkomed MRI 2 where you need it. The three hour battery backup allows for continuous agent delivery and monitoring, so you can rest assured your patient gets uninterrupted care.
